

RED STAG

Hunting the “king of the woods”

The impressive red deer population in our forests provides the best opportunities for you to hunt down a once-in-a-lifetime stag. Proactive fostering and selective hunting here in Silesia lead to constant qualitative improvements of the mature stags and to an overall quantitative growth of the red deer population. Therefore, the rutting season becomes more and more spectacular every year.

Hunting red stags in the wild is challenging and exciting, despite best conditions. The hunter has to be in the hunting ground before dawn to evaluate their options and check the conditions.

You, as our guest, can trust your hunting guide's knowledge and experience. They are professional hunters and know their territories very well. You stalk with them through our beautiful forests of early autumn to the hidden rutting grounds. Every hunter's heart skips a beat when the dominant male appears with his hinds.

Around the 5th September, the hinds get on heat and the exciting time starts. The stags' roaring booms through the forests. The main rutting season ends

around the 30th September.

The hunt for the red stag starts on the 21st August, before the rut. During this time, we can find the stags grazing in the grassy areas which also leads to interesting hunting opportunities.

Our hunting guests shoot approximately 60 red stags each season. Among those, there are strong, medal winning stags on a regular basis. The hunt for the red stag is known as one of the most popular and most thrilling hunts with us in Poland.
